

FortiClient and FortiClient EMS Upgrade Paths

The following chart provides upgrade path information for FortiClient for Windows and macOS 5.2.0 and later versions to 6.0.5. If upgrading FortiClient 5.6.2 and earlier versions via FortiClient EMS fails, it is recommended to uninstall FortiClient, then deploy the latest version of FortiClient from FortiClient EMS.

Starting version	Upgrade path
6.0.5	latest version
6.0.0+ 5.6.0+ 5.4.0+	> 6.0.5
5.2.0+	> 5.6.6 > 6.0.5

The following charts provide upgrade path information for FortiClient EMS 1.0.1+ and FortiClient EMS for Chromebooks 1.0.2+ to 6.0.5.

Note that in 6.0.0 and later versions, FortiClient EMS and FortiClient EMS for Chromebooks are merged into a single application. The tables below indicate that it is possible to upgrade FortiClient EMS for Chromebooks 1.2.4+ to the merged version of FortiClient EMS 6.0.5.

Note that when upgrading FortiClient EMS and FortiClient EMS for Chromebooks to the latest version, it is recommended to perform the upgrade on a staging server before upgrading the production server. For details, see the *FortiClient EMS Administration Guide*.

FortiClient EMS

Starting version	Upgrade path
6.0.5	latest version
6.0.0+ 1.2.4+	> 6.0.5
1.2.0 - 1.2.3 1.0.3+	> 1.2.5 > 6.0.5
1.0.1 - 1.0.2	> 1.0.5 > 1.2.5 > 6.0.5

FortiClient EMS for Chromebooks

Starting version	Upgrade path
6.0.5 (merged FortiClient EMS)	latest version
6.0.0+ 1.2.4+	> 6.0.5
1.2.0 - 1.2.3 1.0.3+	> 1.2.5 > 6.0.5
1.0.2	> 1.0.5 > 1.2.5 > 6.0.5
